Buying Testimony

(CONT. FROM PAGE 1)

against these practices by USDA have been snowed out. Recently the House Agriculture Committee tacked an amendment on the Agricultural Appropriations bill specifically prohibiting this kind of spending by USDA. However, this amendment was lost in the Senate-House conference Committee.

This week another organization joined the forces of those complaining about these methods. President John B. Armstrong of the Texas and Southwestern Cattle Raisers Assn., representing 14,000 cattle producers, spoke out against the use of Federal funds to pay for testimony from groups or individuals favorable to USDA views. (See story in Column 11).

Armstrong suggested more hearings be held in various parts of the country to enable individuals concerned to appear in greater numbers and thus obtain more grass roots opinion concerning new rules and regulations. This procedure could prevent mistakes created by a lack of sufficient study and understanding of the problems and their impact. Armstrong pointed to the beef grading proposals and brucellosis regulations as examples.

Just recently Dr. Donald Kennedy, head of the Food & Drug Administration, announced there would be a delay in FDA's proposed rules banning use of low level antibiotics in livestock and poultry ration and stated the reason for his delay was facts he learned at three meetings in various parts of the country which brought him greater insight into the problem. Facts uncovered in these grass roots meetings served to change FDA's thinking on the impact the proposed ban would bring about.

Currently the USDA's proposals to ban use of nitrates in meat products has created a similar controversy. Congressman Willem C. Wampler of West Virginia and James G. Martin of North Carolina recently introduced legislation which would prohibit the Secretary of Agriculture from taking any action to ban nitrates until three months after the secret study is completed. The Congress has told FDA-USA, please to ban secretin as a food additive until conclusive tests as to the real, instead of "possible", dangers had been established.

USDA recently released a typical "scare" news release charging that a recent study by Massachusetts Institute of Technology indicated nitrates were possibly carcinogenic. USDA promptly stated that 20% of the nitrates ingested by humans come from those used as additives in meat products. Some 80% of the nitrates in the human system originate from natural manufacture of them from green and leafy vegetables. This was immediately challenged by Congressman Martin, who said his information indicated that only 2.1% of nitrates came from cured meats.

McGuirk Hereford
Dispersion Sept. 11
& 12, Claremore, Ok.

Claremore, Okla. — McGuirk Hereford Ranch will hold a complete cowherd dispersion on Sept. 11 and 12 at the ranch located eight miles east of Claremore on

State Highway 20, then one mile south. Selling will be 300 lots including 185 pairs with fall and spring calves at side; 75 bred heifers; 21 open heifers, 50 coming-2-year-old bulls and six herd bulls. The McGuirk Herefords feature 07 Tiberius breeding.

Owner LeRoy McGuirk said, "After a long and timely search for a line of cattle that could change and improve the body type and performance of our cattle, we settled on Tiberius. One of the many strong points of the 07 Tiberius is the line-breeding program used for a number of years by R. K. Field, making the Tiberius one of the most genetically potent lines of cattle available today. The Tiberius also have exceptionally large frame size which is ideal in the current trend for greater body type scores."

For further information contact McGuirk Hereford Ranch, LeRoy McGuirk, owner; Mike Armitage, manager; John Lettmore, cowherd; or Roger Motter, herdsman; Claremore, Oklahoma 74017, phone 918/841-5387.

One thing everybody, except taxpayers and those like Big Labor who enjoy the fruits of Big Spendin' by Govt., are in agreement on is that too much money is wasted by all Govt. and it has finally dawned on just about everyone that that is money that could be more pleasurably squandered by you & me.

One of the brighter spots in the wake of Proposition 13 is the fact that a lot of people are getting interested in not the mere proposition of cutting taxes, but in the actual cutting of the tax. The financial growth that the politicians seem to be able to operate on, some very thoughtful people, among 'em Senator Muskie, advocate termination of a lot of federal programs that hang in there despite the fact they are useless and ineffective.

PINZGAUER

Meat Animal Research Center To Build Purebred Pinzgauer Herd For Crossbreeding

Clay Center, Nebr. — The U.S. Meat Animal Research Center here will build a purebred herd of Pinzgauer cattle to be maintained as a control group in conjunction with its 20-year studies of crossbreeding for lean meat, crossbreeding for general purpose, and crossbreeding for maternal characteristics.

The announcement was made by Dr. Larry V. Cundiff, who is the Research Leader, Genetics and Breeding, at the U.S. MARC, to a large group of Pinzgauer enthusiasts, including 65 visitors from overseas, during the International Pinzgauer Breeders Field Day here July 21. Overseas guests representing Austria, Italy, England, Republic of South Africa, Iraq and New Zealand were accompanied by large delegations from the U.S. and Canada at the field day.

The group toured the facilities of the vast research station which covers 6500 acres of deeded and 2000 acres of leased land. Of primary interest were

the pastures and pens where the Pinzgauers are used in crossbreeding experiments. Results of projects there so far were reported to the group, and showed that ZPinzgauer have honed in most of the economically important traits.

In making his report, Dr. Cundiff reported that 40 percent of the cattle in the United States are crossbred and it is with crossbred cattle that the fastest gains can be made toward more efficient meat production.

Many of the Field Day visitors had already attended Pinzgauer Field days in Canada and at the Wyoming Pinzgauer Ranch at Shorlin; then went on to another Pinzgauer Field Day at Red River Farms, Gallatin, Tenn., July 22.

AVOID CHANGING WELL LEATHERS FOR MANY YEARS
Perma-cups are molded urethane, more wear resistant than nylon. Perma-cups will outlast leathers 10 to 1. Their tapered design allows only 1/8" wear, instead of 5/8" of a leather. Much less friction for easier pumping extends cylinder life greatly. Perma-cups must be used in a good or new cylinder, as they do not swell. Install Urethane Perma-cups, Urethane Check-balls, and Urethane Perma Rod-guides, and don't pull that wall for many years. Thousands are in wells that have not been replaced in 3 years! All are available in standard cylinder and pipe sizes. Write or call for our catalog. We ship same day order is received. This is our 20th year serving ranchers.
